

WINTER STRENGTH

STAY AHEAD OF THE GAME FOR SPRING

Winter Strength is necessary to get through the harsh realities of cold temperatures causing slow growth and dormancy. Floratine's Winter Strength Plan builds and stores carbohydrate reserves for continued strength until spring arrives.

■ REDUCE TEMPERATURE STRESS

Astron provides strength, cell division, and complexed zinc for reduced temperature stress with essential micronutrients and patented biostimulants.

■ COLD TOLERANCE

Carbon K with potassium thiosulfate and Carbon Power technology for improved cold weather tolerance and carbohydrate translocation to the roots.

■ COLOR AND ROOTING

Renaissance's patented phytochemicals and micronutrients for root initiation, stress resistance, and color.

■ ENERGY

Floradox Pro provides needed energy sources required for defense and recuperative protein production.

Carbon K contains Floratine's proprietary carbon translocation technology to enhance uptake and utilization of nutrients.
